Main Offensive Actions

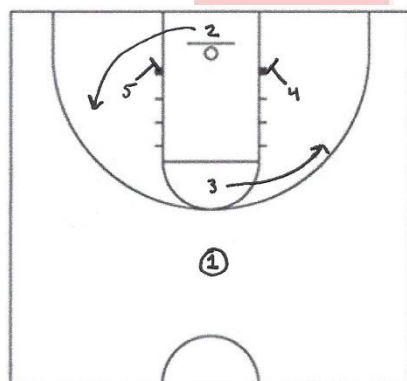

When a play breaks down, or they aren't running one, big will pass to a guard and follow their pass into a ball screen or DHO.

Every set or action they run has options to abandon the rest of the play to enter the ball into the post (TJD or Thompson)

Basic

- When not running a set, they love to middle ball screen with a big, and have the other big post/seal on the side of the lane the driver is on. (clear out the backside for the roll)

Floppy

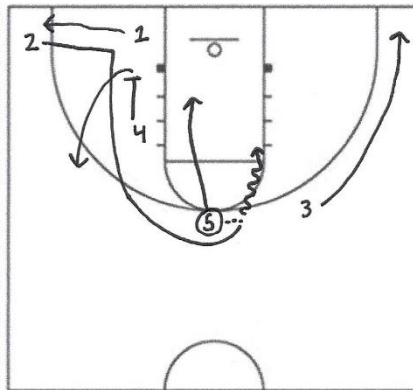

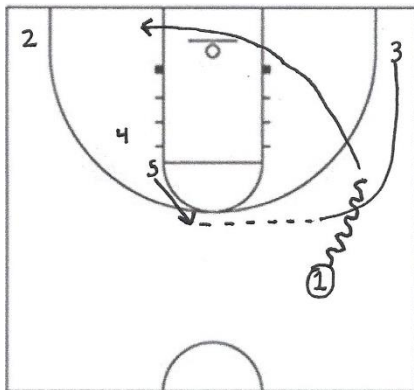

- Like to run this action with Durham or Franklin as the 2.
- Often, the 2 will start in the corner, and the big will screen him into the middle.
- 2 can curl or fade off the screen. 3 always goes opposite.
- They don't cycle through this action more than once or twice per possession. If 2 catches the ball and doesn't have a scoring opportunity, the big will post.

Horns

- Will run this after other sets.
- One big rolls, one big pops.
- The 1 will sometimes pass back to the big that pops, and the other big will post/seal on the same side.

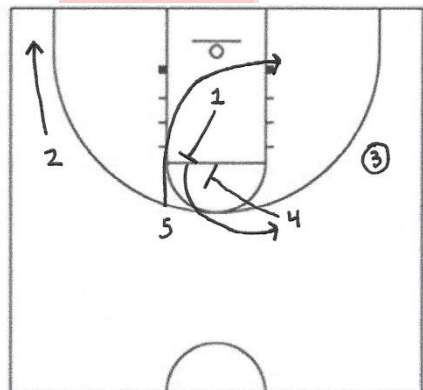

Commonly Run Set Plays

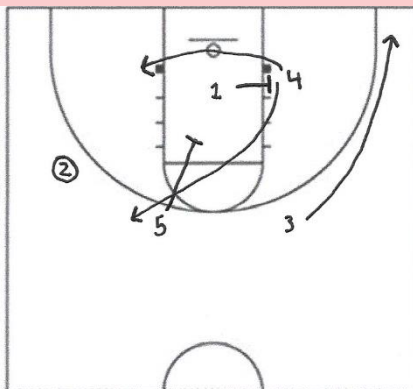

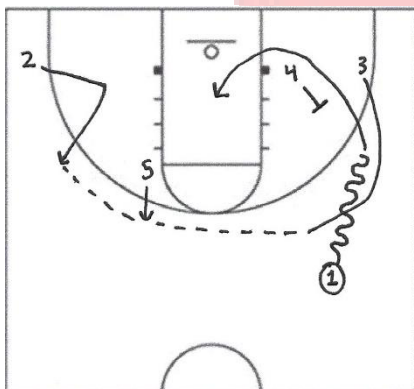

Odd 2 Curl

- “Odd” is an action they use to start multiple plays. The 1 DHOs with the 3 at the slot, and the 3 passes to the 5 who rises to the other slot.
- The 1 occasionally backscreens for the 4 instead of clearing to the corner. Then the 1 fills to the slot.

Odd 15 Backscreen

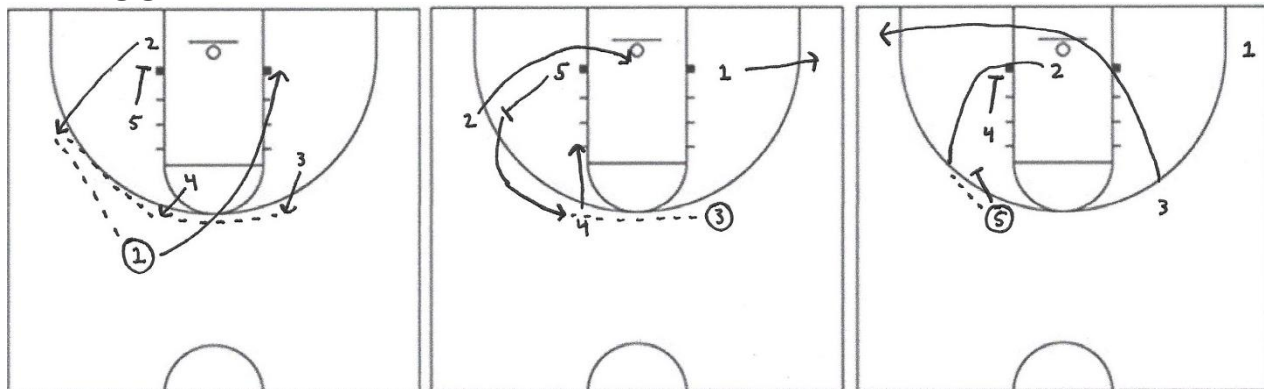

- Looking for a post entry or 3pt shot.

Odd 4 Cross

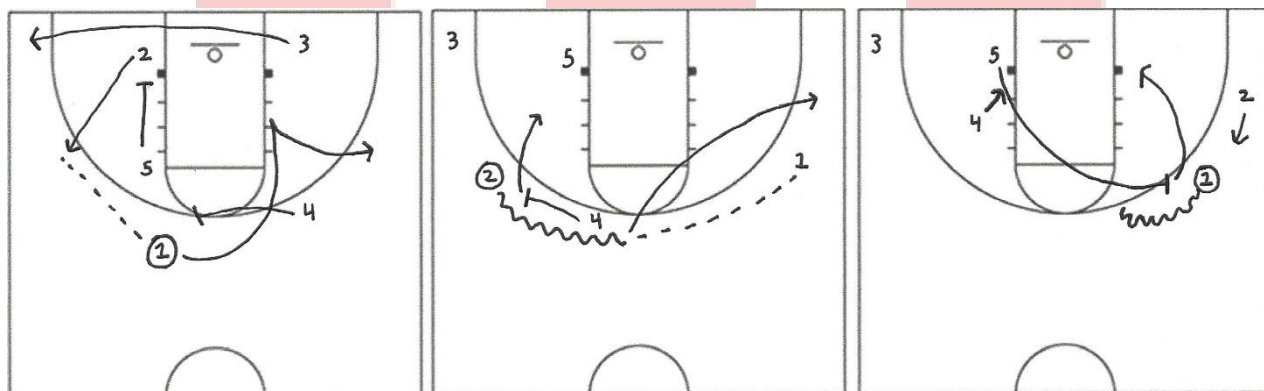

Commonly Run Set Plays

2 Stagger DHO

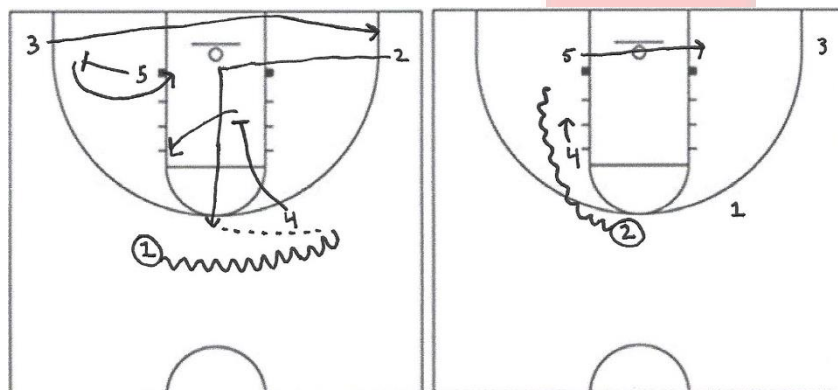

- This play is very similar to Odd 2 Curl.
- Often times, the 3 won't pass back to the 5, and will just pass straight to the 2 coming off the stagger.

51

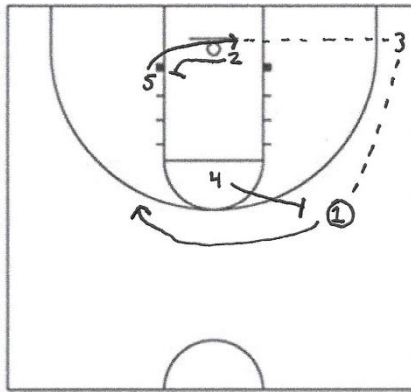

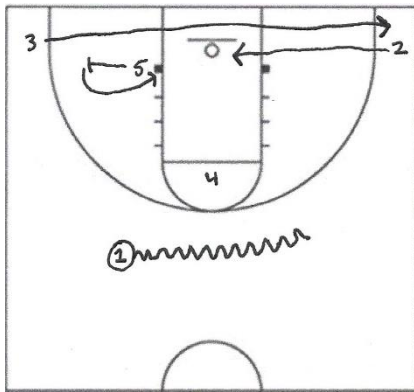

- The 1 cutting to the rim off the very first screen is a real option they look to pass to.
- They will run this with the 4 and 5 switched ("41").
- The 1 doesn't always get the ball back. Sometimes the ball screen comes for the 2.

32 Rub

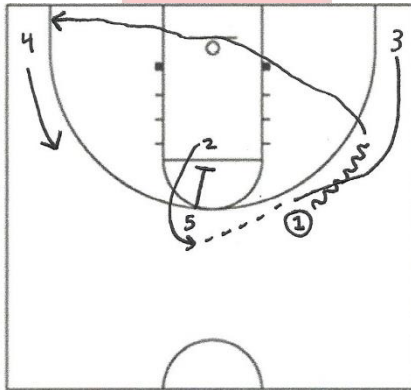

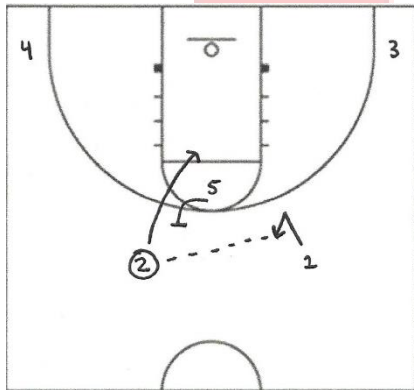

- As the 2 drives towards the 4, the 4 post/seals his defender.
- 50% of the time they run this set, the 1 won't dribble to the opposite slot or pass to the two. Instead, he just looks for the 5 on a post up.

Commonly Run Set Plays

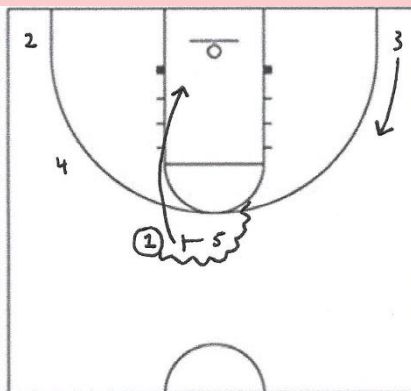

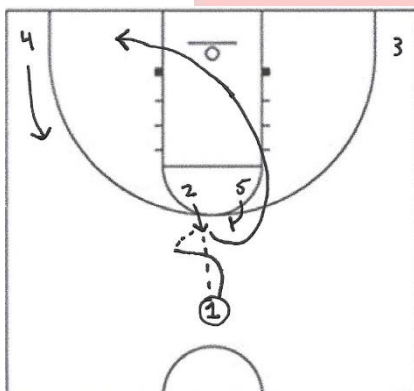

25 Rim

- 25 Rim and 32 Rub play off of each other.

25 Double

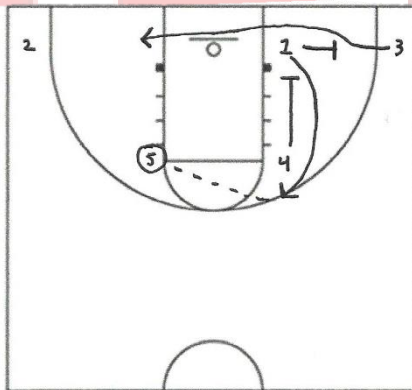

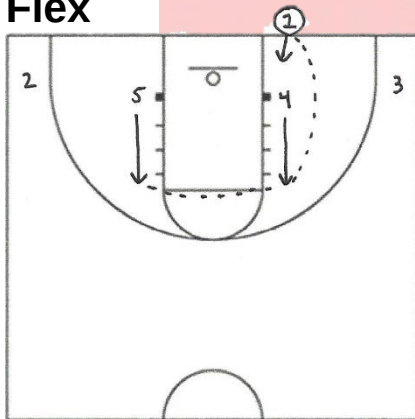

Double Screen 5

BLOB

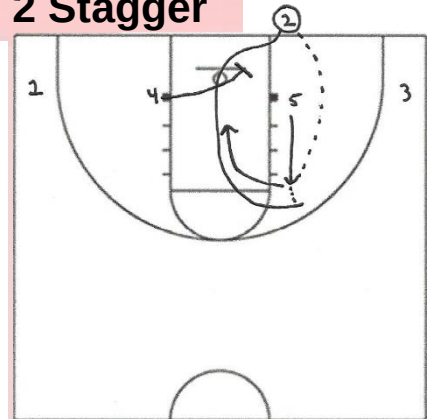

In the last 9 games, IU has run Flex or 2 Stagger on 74% of their BLOB possessions.

They initiate both from a 4-low setup, and a lob pass to the ball side big who rises to the elbow. If the big isn't open, they'll pass it in to the ball side corner who will pass it to the big at the elbow.

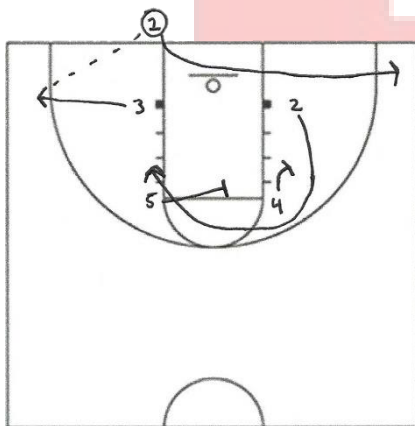

Flex

2 Stagger

- 3 has the option to use the downscreen or the flex screen.
- Won't reverse the ball more than twice before going back to their normal offense.

Box 2 Curl

3 Double
